## Pre-amble

Dear all,

Greetings from the department of Anatomy, SSIMS&RC, Davangere.

We are immensely happy to invite all the enthusiasts for the CME on 'Medical Genetics & fetal medicine'.

In the recent era, molecular cytogenetics has become an integral part of cytogenetic laboratory, which helps in diagnosing the cases from chromosomal disorders to those with cancer.

This CME will enrich the participants with basic knowledge of cytogenetics right from chromosomal analysis to the depth of advanced knowledge of molecular diagnosis in certain genetic disorders, with fetal interventional techniques & 1<sup>st</sup> trimester scanning to Genetic counseling.

The main aim of this CME is to highlight genetic disorders prevailing in society & how to diagnose & counsel them. Thus forming a bridge between the cytogenetic lab of Anatomy Dept. and clinicians, not forgetting the rural health setups in solving these problems.

With best wishes,  
Organising Committee
